

# My Home management controls

Centralised, local or remote management of all My Home automation functions via user-friendly and innovative control interfaces.

*10" Multimedia touchscreen*

## ARTEOR 10" TOUCHSCREEN

Access to all home automation functions using a graphics interface: scenarios launched manually or at pre-programmed times, light management, roller shutter control, temperature display and management, intruder alarm activation/deactivation and creation of a security area, sound system management (musical source selection, volume adjustment, etc.) and video door entry call display.

*3.5" Touch screen*

## ARTEOR 3.5" TOUCHSCREEN

Access to all My Home automation functions via icons: launch of scenarios, light and roller shutter management, temperature display and management, alarm activation/deactivation, sound system management, consumption displays.

*Remote management*

## TCP-IP WEBSERVER

Used for communicating between a BUS/SCS installation and a TCP-IP network for managing the installation remotely from a computer or mobile phone connected to the Internet.
